

RAVI ANAND KUMAR

FRONTEND TECH LEAD · ANGULAR & TYPESCRIPT · AI-ASSISTED ENGINEERING

Berlin, Germany | ravianand1988@live.com | +49 159 0136 9196 | linkedin.com/in/ravianandkumar | github.com/ravianand1988 | stackoverflow.com/users/2444505/ravi-anand

Portfolio: ravianand1988.github.io

SUMMARY

Frontend Tech Lead with 12+ years in software engineering, the last 6+ years on frontend architecture and leadership (Angular, TypeScript, RxJS, NgRx), building on earlier full-stack and backend work (C#/.NET, Python/Django, Vue.js, Java/Kotlin). Component-driven architecture and design systems, plus custom Claude Code tooling that brings AI-assisted engineering into daily development. Permanent Residence in Germany, no visa sponsorship required.

EMPLOYMENT

byrd technologies GmbH, Berlin, Germany

Oct 2019 – Jul 2026

Frontend Tech Lead (Aug 2024 – Jul 2026) · Sr. Frontend Engineer (Oct 2022 – Jul 2024) · Frontend Engineer (Oct 2019 – Sep 2022)

Tech: Angular, TypeScript, RxJS, NgRx, Node.js, Python, Java, Kotlin, PostgreSQL, AWS, Docker

- Led frontend architecture for byrd's B2B logistics platform (Partner, Customer, Admin dashboards) across inbound, outbound, returns, and shipment workflows
- Drove major platform initiatives end-to-end: migrating domain state out of per-app code into shared versioned packages, and the Storage Zones feature that optimized warehouse picking
- Kept the frontend codebase current through five consecutive major Angular upgrades (v13 → v17), including the typed-forms migration
- Interviewed, hired, and onboarded frontend engineers; mentored engineers across teams through code review, pairing, and knowledge sharing
- Authored and maintained byrd_claude_plugins - a Claude Code plugin repo (branch creation, planning, PR review, DB migrations, RC publishing) used daily
- Built an in-house tool to manage multi-locale i18n translation files against a third-party platform, streamlining localization
- Owned CI/CD pipelines (GitHub → CI/CD → Docker → AWS) and automated the release/deployment tagging process
- Owned and published federkleid (byrd's Storybook design system) plus 8 internal Angular libraries used across three dashboard frontends, with regular RC releases
- Contributed to and reviewed pull requests for byrd's Java-based Android warehouse app (picking/packing, putaway, returns), then led its migration from Java to Kotlin
- Maintained ~9,900 Karma/Jasmine unit and component tests across the frontend estate, backed by a custom CI gate that fails any build containing skipped specs
- Maintained Selenium-based end-to-end test coverage for frontend projects; completing a Playwright fundamentals course to modernize the E2E stack

Assistr Digital Health Systems GmbH, Berlin, Germany

Sep 2017 – Oct 2019

Software Developer

Tech: Vue.js, JavaScript, Python, Django, PostgreSQL, AWS, Docker

- Joined AssistMe, a healthcare platform for independent living, at inception and took it from early R&D to production; built full-stack features (Vue.js/ES6, Django REST APIs, PostgreSQL) test-first with Jest, plus CI/CD pipelines on AWS

AppFlow Solutions, Faridabad, India

Aug 2015 – Sep 2017

Software Engineer

Tech: C#, ASP.NET MVC, JavaScript, Azure, MS SQL

- Built DIM (Data Input Manager), a web-based intranet application for a US hospitality client (C#/ASP.NET MVC), including the Profit & Loss synopsis module, Azure AD authentication, and automated daily file processing via Azure Logic Apps and Functions

INF India Pvt. Ltd, Faridabad, India

Dec 2013 – Sep 2015

Software Engineer Intern

Tech: C#, JavaScript, jQuery, CSS, HTML, Azure, MS SQL

- Built RESTful APIs, the web frontend, and the SQL Server database layer (stored procedures, triggers) for a loyalty card management system

KEY SKILLS AND KNOWLEDGE

FRONTEND Angular, TypeScript, JavaScript, RxJS, NgRx, HTML, CSS, Node.js, Component-Driven Architecture, Design Systems

BACKEND Python, Java, Kotlin, REST APIs

CLOUD & DEVOPS AWS, Docker, Kubernetes, CI/CD, Azure

TESTING Selenium, Playwright (in progress)

LEADERSHIP Team Mentoring, Hiring & Onboarding, Coding Standards, Code Reviews

TOOLS Git, Jira, Storybook

AI-ASSISTED ENG. Claude Code, GitHub Copilot, OpenAI Codex, LLM Agents & Sub-agents, Custom Dev Tooling/Plugins

PROJECTS

Job Finder and Application Tracker

Personal project · 2026 · built with Claude Code

- Built a local job search and application tracker in an npm workspaces monorepo: Angular with Signals and a CDK drag-and-drop Kanban board, Fastify/TypeScript API, Prisma/SQLite, with job-board aggregation, deterministic role scoring, and an ATS keyword-match checker

Family Business ERP - FMCG Wholesale & Distribution

Personal project · built 2018–19 · in production since 2019

- Solo-built and maintained an ERP (WinForms/.NET, EF6, SQL Server) that runs day-to-day operations - inventory, purchase/sales orders, sales returns, and GST invoicing - for a regional FMCG wholesale distributor working with ~90 consumer brands
- Leading a zero-downtime strangler-pattern migration to Angular + ASP.NET Core/EF Core (SQL Server → PostgreSQL planned), extracting GST/invoicing rules from UI code into a service layer while old and new run concurrently

Gerber (PCB) Viewer

Personal project · repository private for now

- Built a Gerber/RS-274X parser and renderer shared across a .NET core, a WPF desktop shell, and an Angular web app

EDUCATION & LANGUAGES

EDUCATION IGNOU, Master of Computer Applications (2015) · NIIT, Diploma in Software Engineering (2011)

LANGUAGES Hindi (Native) · English (Fluent) · German (B1)
